Gia Bao Nguyen Tran
Frontend Developer

Email: ngtrgiabao251002@gmail.com | Linkdin: linkedin.com/in/gbao | Github: https://github.com/ngtrgiabao

My Porfolio

A Frontend Developer with 1.5 years of experience, specializing in high-performance ReactJS applications and collaborative work in diverse communities.

SKILLS

Programming Libraries:	Languages: **JavaScript**, TypeScript, Node
	ReactJS
Frameworks:	SASS/SCSS, **TailwindCSS**, Bootstrap, ExpressJS
Databases:	MongoDB, Firebase
Version Control:	Git, Gitlab, Github
Others:	OOP, CRUD, Agile

PROJECTS

Yanji Social (Team size: 1 member)   Jul 2023 - Aug 2023 (3 month) - CAN THO UNIVERSITY

Position: FullStack Developer
Description: Yanji Social Project is a web app ReactJS where a user can sign up, make a post, comment, chat and like on friend's posts. It uses React for templating and using Cloudinary to storage Image, Videos, etc.
Technologies:
- Frontend: ReactJS, TailwindCSS, Redux
- Backend: Socket.io, ExpressJS
- Database: MongoDB
- Cloud: Cloudinary

Responsibilities:
- Design UI/UX and implement additional functionalities (both backend and frontend) base on the requirements
- Design database schema and implement backend services for the app
- Employed Socket.io and ExpressJS to build the backend services, enabling real-time communication and data handling.
- Utilized Cloudinary to efficiently store and manage images, videos, and other media assets.
- Utilized ReactJS, TailwindCSS, and Redux to enhance the user interface and user experience.
- Designed and implemented additional features and functionalities in line with project requirements.
